CAREER OBJECTIVE

Dedicated Computer Science student and software developer with knowledge of Java, Object-Oriented Programming, SQL, and web development. Experienced in collaborative projects and building practical software solutions, with a strong interest in continuous learning.

EDUCATION

Bannari Amman Institute of Technology – B.E., Computer Science and Engineering	2022 – 2026	CGPA: 8.26
Bannari Amman Vidhya Niketan – 12th, HSC	2020 – 2021	93.8%
Bannari Amman Vidhya Niketan – 10th, SSC	2018 – 2019	95.0%

PROJECTS

Water Footprint Tracker <i>React.js, Node.js, Express.js, MongoDB, AI</i>	Team Size: 1
- Developed an AI-powered web application that identifies food products through image upload, camera scanning, or manual text input and estimates agricultural water footprint. - Developed the React.js frontend with responsive interfaces and interactive visualizations for food identification and water-footprint results. - Built REST APIs using Node.js and Express.js to handle food identification requests and serve water-footprint data. - Displayed the total water requirement in litres/kg along with Blue, Green, and Grey Water Footprint components for each food product. - Used location access to rate crop suitability as Excellent, Moderate, or Poor and show the food's irrigation method. - Integrated Node.js, Express.js, MongoDB, and AI-based product identification to process user inputs and retrieve water-footprint information.	
Green Product Sales Hub <i>React.js, Node.js, Express.js, MongoDB</i>	Team Size: 1
- Developed a web platform that connects farmers directly with customers, enabling direct communication and product sales without intermediary brokers. - Developed the React.js frontend with responsive interfaces, navigation, and components for farmer and customer workflows. - Built backend REST APIs with Node.js and Express.js to handle farmer and customer data, authentication, and product listings. - Designed product-focused workflows that help farmers reach customers directly and improve potential profit margins by reducing dependence on intermediaries. - Integrated the frontend with Node.js/Express.js APIs and MongoDB while supporting multilingual features and product-focused workflows.	

TEACHING EXPERIENCE

- Trained first- and second-year students in C programming concepts and problem-solving.
- Conducted coding practice sessions and clarified programming concepts.
- Assisted students in improving coding skills and debugging programs.
- Delivered a Java training program at Loyola Engineering College via BYTS.

ACHIEVEMENTS

- Won **3rd place** at the college level hackathon at Bannari Amman Institute of Technology (2025) by building Water Footprint Tracker, an AI powered MERN web app that estimates the water footprint of food products.
- State winner** at Tamil Nadu Skills 2023 (₹20,000 prize) and **national finalist** at India Skills 2024 in Textile Weaving (Handloom).
- Won **2nd place** at the Zonal Level Chess Tournament, Sathyamangalam City.

CERTIFICATIONS

- NPTEL – The Joy of Computing using Python**
- NPTEL – Programming in Java**

SKILLS

Programming Languages: Java, C	Core Concepts: Core Java, Object-Oriented Programming
Web Technologies: React.js, Node.js, Express.js	Database: MySQL, MongoDB
Query Language: SQL	Tools: Git, Visual Studio Code, Figma, SQL Workbench
Soft Skills: Communication, Team Collaboration, Adaptability	
Areas of Interest: Core Java, Object-Oriented Programming, SQL, Software Development	
Languages: English (R-S-W), Tamil (R-S-W), Hindi (R-W)
